

Hi-Teach

Hi—Teach aims to transform teachers into Hi-teachers

The Hi-Teach project (June 1, 2021 – May 31, 2023) aims to provide a third way to transform teachers into Hi-Teachers. Thanks to the collaboration of 10 universities from 5 European countries (Greece, Italy, Poland, Slovenia and Spain) and two training centers on technological innovation (from Italy and Spain), Hi-Teach will strengthen digital skills and teaching approach of university teachers, providing them with the most up-to-date methodologies and tools.

THE THIRD MULTIPLIER EVENT ON HI-TEACH PROJECT

On 17th February at Adam Mickiewicz University – the largest University in Poznan the third multiplayer Hi Teach event was hosted at the University of Poznan, with Prof. Maciej Pietrzykowski Chair of International. Prof. Pietrzykowski provides an introduction of trends in education, hi-teach project as a response to perceived problems and discussion. The event was attended by teachers, PhD students and high school students.

How to deal with this trends affecting education?

During the workshop, prof and students discussed about what affect education most, and the lessons went through the digital and green revolution to globalisation of the education market and increasing competition in the market. This also include a crisis of traditional education plus changing audience expectations and in addition the pandemic and distance learning.

RETHINKING THE TEACHING PROCESS IN THE POST-COVID ERA: SHARING EXPERIENCES WITH

More than 190 nations, all the continents and around 2 billion students have been affected by the effects of the pandemic with a subsequent progressive increase in innovation in the education sector with more people resorting to immersive technologies such as virtual reality (VR) and augmented reality (AR) as they allow the exploration of digital learning material in new, innovative ways.

Digitizing High Education is not just about going online: it's a new way of thinking the teaching/training process focusing on 5 main themes:

1. readiness level for Covid emergency teaching process;
2. how teachers managed the emergency (where digitization is not synonymous with simplification);
3. lessons learnt from the pandemic: acceleration in change, life-long learning, new IT needs;
4. towards new tools, methods and contents;
5. towards a new pedagogy approach: time, digital gap, structured thinking, performance.

The seminar will offer the opportunity to discuss these topics considering the concrete experience developed with the students in the classroom.

Friday 31st March 2023 at 11:30-13:00.
